the main purpose of development is to spread freedom and its thousand charms to the unfree citizens the author explains how in a world of unprecedented increase in overall opulence millions of people living in the third world are still unfree even if they are not technically slaves they are denied elementary freedom and remain imprisoned in one way or another by economic poverty social deprivation political tyranny or cultural authoritarianism

amartya sen uses his 1999 work development as freedom to evaluate the processes and outcomes of economic development having come to the conclusion that development is best summed up as

the expansion of freedom sen examines traditional definitions and understandings of the term he says people tend to think of freedoms as economic the freedom to enter into market exchanges or political the freedom to vote and be an active citizen and tries to understand why the definition has been so narrow hitherto he concludes that an evaluation of true freedom must necessarily include the freedom to access social services such as healthcare sanitation and nutrition just as much as it must acknowledge economic and political freedoms evaluating the relevance of the current thinking behind development sen concludes that the term freedom cannot simply be about income in many ways measuring income does not account for various unfreedoms manmade or natural bars to wellbeing that hinder development sen's evaluation is all the more powerful for its clarity the freedom centered perspective has a generic similarity to the common concern with quality of life

please note this is a companion version not the original book sample book insights 1 there is a connection between opulence and achievements but the link may or may not be strong and depend on many other circumstances the issue is not the ability to live forever on which maitreyee concentrated but the capability to live a good life while you are alive 2 the usefulness of wealth is in the things it allows us to do but this relation is not exclusive or uniform since the impact of wealth on our lives varies with other influences development must be more concerned with enhancing the lives we lead and the freedoms we enjoy 3 there are many ways in which people are deprived of their freedom for example many people in third world countries lack basic opportunities of health care or functional education or gainful employment or economic and social security 4 economic development has many dimensions including economic security political liberty and civil freedoms are also important on their own and do not have to be justified indirectly in terms of their effects on the economy

rationality and freedom are among the most profound and contentious concepts in philosophy and the social sciences in this the first of two volumes amartya sen brings clarity and insight to these difficult issues
