how poignant it is to look at some of Gould's beautiful images of our animals and know that some are no longer with us and some are fighting for their lives in this book author Fred Ford compares Gould's world and the world that the animals live in at that time with the world today John Gould's Extinct and Endangered Mammals of Australia includes 46 Australian mammal species that today are threatened or extinct and that were portrayed in the lavish colour plates in John Gould's 1863 publication The Mammals of Australia each animal opener spread begins with a Gould plate accompanied by at a glance a very short summary the conservation status according to the EPBC Environment Protection and Biodiversity Conservation list the species names a map of its former and current distribution and sites of reintroduction and a timeline of the species history since

European colonisation accompanying the pictures are accounts of the animals as they lived in the relatively untouched Australia that John Gould knew and evidence of the attitudes of European settlers towards the native fauna. The author provides the reader with fascinating and often poignant material and stories of what would be considered today as shameful behaviour and attitudes towards Australia's native fauna. In this book are not only sobering stories of the fate of these animals after Gould's time but also success stories of reintroducing species to places ridding areas of introduced pests and preserving habitat.

This book reports changes in GP ordering of imaging tests in Australia from 2002/03 to 2011/12 and evaluates alignment between guidelines and recent GP test ordering for selected problems over the decade. 9 802 GPs participated in Beach providing details of 980 200 GP patient encounters. The likelihood of GPs ordering imaging in the management of a problem increased over time. In recent practice at least one imaging test was ordered at 9 of encounters at a rate of 10 imaging tests per 100 encounters. Diagnostic radiology was the most commonly ordered type of imaging test but the order rate decreased over time with a shift toward orders for ultrasound, CT and MRI which all significantly increased. Eight selected problems accounted for one third of all imaging orders. Imaging ordering behaviour suggests broad compliance with published guidelines in the management of osteoarthritis, shoulder problems, bursitis, tendonitis, synovitis, abdominal pain and other musculoskeletal injuries. Current ordering patterns for knee problems and some sprains/strains have potential for improvement. The ordering pattern for new presentations of back problems was inconsistent with all established guidelines for management of back problems.

A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC) an ocean current that flows from west to east around Antarctica plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border, the Antarctic Convergence, which fluctuates with the seasons but which encompasses a discrete body of water and a unique ecologic region. The convergence concentrates nutrients which promotes marine plant life and which in turn allows for a greater abundance of animal life. In 2000 the International Hydrographic Organization delimited the waters within the convergence as a fifth world ocean, the Southern Ocean, by combining the southern portions of the Atlantic Ocean, Indian Ocean and Pacific Ocean. The Southern Ocean extends from the

coast of antarctica north to 60 degrees south latitude which coincides with the antarctic treaty limit and which approximates the extent of the antarctic convergence as such the southern ocean is now the fourth largest of the world's five oceans after the pacific ocean atlantic ocean and indian ocean but larger than the arctic ocean

australian climate policy and diplomacy provides a well overdue critique of existing and high profile publications that convey the greenhouse mafia hypothesis which posits that australia's weak policy response to climate change is the result of a menacing domestic fossil fuel lobby ben l parr argues that the shared government industry discourse about protecting australia's industrial competitiveness has had a more decisive influence in shaping and legitimising australian climate policy than the direct lobbying tactics of the fossil fuel industry parr also reveals how the divergent foreign policy discourses and traditions of australia's two major political parties as internationalist versus alliance focused have enabled and constrained their climate diplomacy and domestic policies over time to demonstrate his argument he presents a discourse analysis woven into a chronological policy narrative comprising more than 1000 primary texts media releases interviews and speeches generated by prime ministers and key fossil fuel lobbyists overall this volume illustrates how domestic forces have and are influencing australia's climate policy in doing so it also provides a framework that can be adapted to examine climate mitigation policies in other countries notably canada and the us this book will be of interest to students and scholars of climate change environmental policy and governance and australian climate change policy and politics more specifically as well as policymakers and practitioners working in these fields

australia has always been reliant on great and powerful friends for its sense of national security and for direction on its foreign policy first on the british empire and now on the united states australia has actively pursued a policy of strategic dependence believing that making a grand bargain with a powerful ally was the best policy to ensure its security and prosperity dangerous allies examines australia's history of strategic dependence and questions the continuation of this position it argues that international circumstances in the world and in the western pacific especially now make such a policy highly questionable since the fall of the soviet union the united states has also changed dramatically making it less relevant to australia and a less appropriate ally on which australia should rely malcolm fraser argues that australia should adopt a much greater degree of independence in foreign policy and that we should no longer merely follow other nations into wars of no direct interest to australia or australia's security he argues for an end to strategic dependence and for the timely establishment of a truly independent australia

this book investigates and explains the extent to which different liberal democracies have resorted to the use of force since the 9/11 terrorist attacks the responses of democratic states throughout the world to the september 2001 terrorist attacks have varied greatly this book analyses the various factors that had an impact on decisions on the use of force by governments of liberal democratic states it seeks to explain differences in the security policies and practices of australia canada france germany and the uk regarding the war in afghanistan domestic counterterrorism measures and the iraq war to this end the book combines the concepts of strategic culture and

securitisation into a theoretical model that disentangles the individual structural and agential causes of the use of force by the state and sequentially analyses the impact of each causal component on the other it argues that the norms of a strategic culture shape securitisation processes of different expressions which then bring about distinct modes of the use of force in individual security policy decisions while governments can also deviate from the constraints of a strategic culture this is likely to encounter a strong reaction from large parts of the population which in turn can lead to a long term change in strategic culture this book will be of much interest to students of strategic culture securitisation european politics security studies and ir in general
