Supers model proposes five stages: Growth (0-14), Exploration (15-24), Establishment (25-44), Maintenance (45-64), and Decline (65+). Each stage is characterized by specific developmental tasks and challenges.

Application in Counseling: Counselors use this framework to understand clients' current stage of career development and to address the developmental tasks relevant to that stage. For example, a client in the exploration stage might benefit from career exploration activities, while a client in the maintenance stage might focus on career advancement or adaptation to changing work environments.

It emphasizes the interplay between personal factors (self-efficacy, beliefs, outcome expectations, goals), environmental factors (social and cultural contexts), and behavior actions taken to pursue career goals.
