in recent times the idea of cloaking has become very popular after radar and sonar were discovered problems of visibility reduction for physical bodies in air by electromagnetic waves or in water by acoustical waves have immediately become serious

engineering applications offer benefits and opportunities across a range of different industries and fields by developing effective methods of analysis results and solutions are produced with higher accuracy numerical and analytical solutions for solving nonlinear equations in heat transfer is an innovative source of academic research on the optimized techniques for analyzing heat transfer equations and the application of these methods across various fields highlighting pertinent topics such as the differential

transformation method industrial applications and the homotopy perturbation method this book is ideally designed for engineers researchers graduate students professionals and academics interested in applying new mathematical techniques in engineering sciences

from the reviews astronomy and astrophysics abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences it is the most important english language abstracting journal in the mentioned branches the abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material the aaa is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences as such it represents a necessary ingredient of any astronomical library all over the world space science review dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use the series appears to be so complete in its coverage and always less than a year out of date that i shall certainly have to make a little more space on those shelves for future volumes the observatory magazine
